

BY ZONAVITA

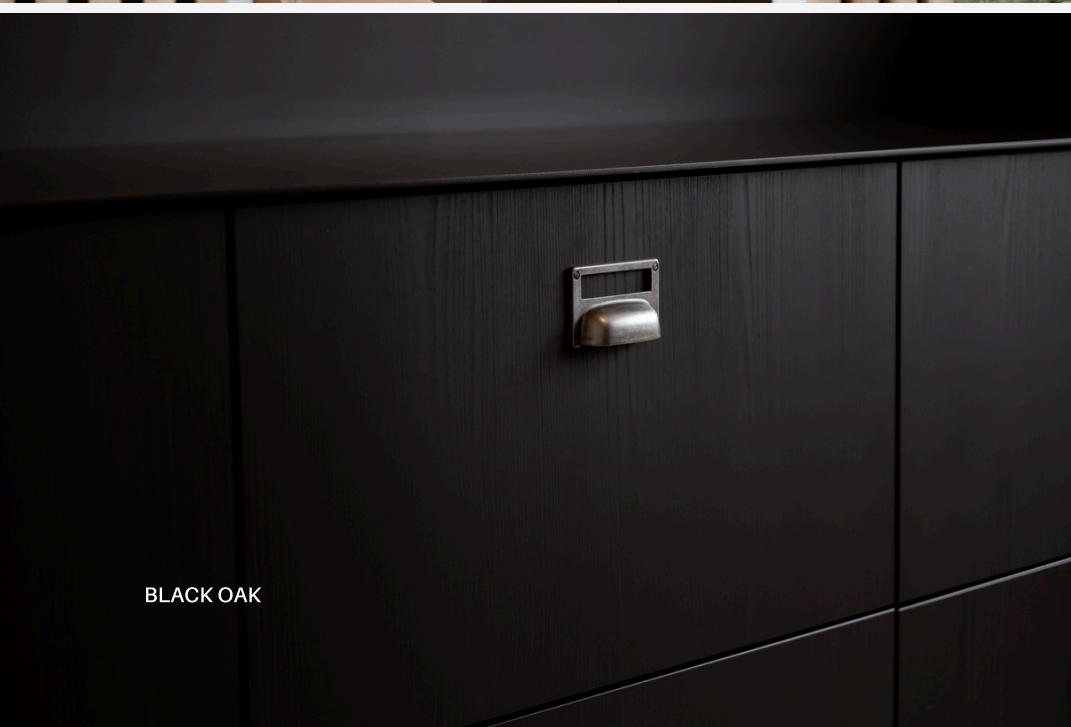

MODERN EUROPEAN CABINETRY FOR THE NORTH AMERICAN HOME

In essence, there is not much difference in the quality of product itself between what Zonavita offers in North America compared to what is offered in Europe. Then what sets us further apart from a European kitchen?

Zonavita's cabinets are made from a collection of high-quality and prefinished materials sourced from across Europe. Yet, by having our production line located in Canada, all Zonavita cabinetry is designed, built and shipped within North America, allowing our customers to have their kitchen in a much shorter timespan. Once the design is set and agreed upon, it only takes a few weeks to build and ship the cabinetry to our customer anywhere in the continent, ready for installation.

Additionally, being part of the Decor family, Zonavita shares the same, high-quality customer service team, offering the highest standard of service throughout the entire process from design to installation.

DRAWER REVEAL

In this mudroom we took the extra step in the shoe storage by adding open cut at the top of the drawers. This allows shoes to be tossed in and the drawers can air out. Perfect for our Manitoba winter and spring.

EMBOSSSED WOOD VENEER WITH BURNED WOOD PATTERN

Our TFL (Thermally Fused Laminate), also known as melamine, comes from the highest producers of quality in TFL. The woodgrain melamine collection offers materials with intense realism and incredible depth of color and texture. While the 'Supermat' finishes offer the ability for full matching to cabinet interiors and exteriors.
